Right here, we have countless books the changing faces of journalism tabloidization technology and truthiness shaping inquiry in culture communication and media studies and collections to check out. We additionally find the money for variant types and moreover type of the books to browse. The all right book, fiction, history, novel, scientific research, as skillfully as various other sorts of books are readily understandable here.

As this the changing faces of journalism tabloidization technology and truthiness shaping inquiry in culture communication and media studies, it ends stirring creature one of the favored ebook the changing faces of journalism tabloidization technology and truthiness shaping inquiry in culture communication and media studies collections that we have. This is why you remain in the best website to see the incredible ebook to have.
The Changing Faces of Journalism - Barbie Zelizer 2009-05-07 The collection is introduced with an essay by Barbie Zelizer and organized into three sections: how tabloidization affects the journalistic landscape; how technology changes what we think we know about journalism; and how ‘truthiness’ tweaks our understanding of the journalistic tradition. Short section introductions contextualise the essays and highlight the issues that they raise, creating a coherent study of journalism today.

The Christian Science Monitor: An Evolving Experiment in Journalism - Linda K. Fuller 2011-09-12 This text provides a unique examination of The Christian Science Monitor, a highly respected, venerable news publication that has survived over a century of changes and challenges. Includes intriguing content derived from authorized interviews with managers and writers from The Christian Science Monitor. Presents case studies on pivotal topics like terrorism, international issues, gender, and sexual orientation issues.

The Handbook of Global Online Journalism - Eugenia Siapera 2012-07-03 The Handbook to Global Online Journalism features a collection of readings from international practitioners and scholars that represent a comprehensive and state-of-the-art overview of the relationship between the internet and journalism around the world. Provides a state-of-the-art overview of current research and future directions of online journalism. Traces the evolution of journalistic practices, business models, and shifting patterns of journalistic cultures that have emerged around the world with the migration of news online. Written and edited by top international researchers and practitioners in the area of online...
journalism Features an extensive breadth of coverage, including economics, organizational practices, contents and experiences Discusses developments in online news in a wide range of countries, from the USA to Brazil, and from Germany to China Contains original theory, new research data, and reviews of existing studies in the field

**Changing Journalism** - Peter Lee-Wright
2011-07-14 Journalism is in transition. Irrevocable decisions are being made, often based on flimsy evidence, which could change not only the future of journalism, but also the future of democracy. This book, based on extensive research, provides the opportunity to reflect upon these decisions and considers how journalism could change for the better and for the good of democracy. It covers: the business landscape, work and employment, the regulatory framework, audiences and interaction, the impact of technology on practices and content, ethics in a converged world. The book analyses research in both national and local.

**Digital Technology and Journalism** - Jingrong Tong
2017-10-09 This edited volume discusses the theoretical, practical and methodological issues surrounding changes in journalism in the digital era. The chapters explore how technological innovations have transformed journalism and how an international comparative perspective can contribute to our understanding of the topic. Journalism is examined within Anglo-American and European contexts as well as in Asia and Africa, and comparative approaches and methods for journalism studies in the digital age are evaluated. In so doing, the book offers a thorough investigation of changes in journalistic norms, practices and genres in addition to providing an international and comparative perspective for understanding these changes and what they mean to journalism. Written by both leading scholars and media practitioners in the field, the articles in this collection are based on theoretical frameworks and empirical data,
drawn from content analysis of newspaper and online coverage, in-depth interviews with news practitioners, observation on the websites of news organisations and analysis of journalists on Twitter. The result is a cohesive compilation that offers the reader an up-to-date and comprehensive understanding of digital developments in journalism and comparative journalism studies.

**Managing Media Work**-Mark Deuze 2011
Managing Media Work provides a comprehensive, cross-national overview of the theory and practice of working in the media in the digital age. Focusing on three key areas—new media work, media professions, and media management—this text prepares students to effectively manage their own media careers and to manage human capital in creative companies. Written by leading international scholars, the book addresses the increasingly global, networked, and unpredictable nature of the media industry as well as the growing complexities of media work.

**Media in Europe Today**-Josef Trappel 2011
Media in Europe Today provides a comprehensive overview of European media in its current state of transformation. Through a focus on specific European media sectors, it assesses the impact of new technologies across industries and addresses a wide range of practices, strategies, and challenges facing European media today. The Euromedia Research Group has more than twenty years of experience in the observation of trends affecting media today, and this book marks the strong continuation of that long tradition.

**The Future of Journalism**-Bob Franklin 2013-09-13
The future of journalism is hotly contested and highly uncertain reflecting developments in media technologies, shifting business strategies for online news, changing media organisational and regulatory structures,
the fragmentation of audiences and a growing public concern about some aspects of tabloid journalism practices and reporting, as well as broader political, sociological and cultural changes. These developments have combined to impoverish the flow of existing revenues available to fund journalism, impact radically on traditional journalism professional practices, while simultaneously generating an increasingly frenzied search for sustainable and equivalent funding - and from a wide range of sources - to nurture and deliver quality journalism in the future. This book brings together journalists and distinguished academic specialists from around the globe to present the findings from their research and to discuss the future of journalism, the shifting quality of its products, its wide ranging sources of finance, as well as the economic and democratic consequences of the significant changes confronting Journalism. The Future of Journalism details the challenges facing the press in contemporary societies and provides essential reading for everyone interested in the role of journalism in shaping and sustaining literate, civil and democratic societies. This book consists of special issues from Journalism Studies and Journalism Practice.

The Crisis of Journalism Reconsidered-Jeffrey C. Alexander 2016-06-20 This collection of original essays interrogates the 'crisis of journalism' narrative from a dramatically different perspective.

Religion, Media, and Social Change-Kennet Granholm 2014-09-19 In an era of heightened globalization, macro-level transformations in the general socioeconomic and cultural makeup of modern societies have been studied in great depth. Yet little attention has been paid to the growing influence of media and mass-mediated popular culture on contemporary religious sensibilities, life, and practice. Religion, Media, and Social Change explores the correlation between the study of religion, media, and popular culture and broader sociological
theorizing on religious change. Contributions devote serious attention to broadly-defined media including technologies, institutions, and social and cultural environments, as well as mass-mediated popular culture such as film, music, television, and computer games. This interdisciplinary collection addresses important theoretical and methodological questions by connecting the study of media and popular culture to current perspectives, approaches, and discussions in the broader sociological study of religion.

**Changing the News**-Wilson Lowrey 2011-06-03
Changing the News examines the difficulties in changing news processes and practices in response to the evolving circumstances and struggles of the journalism industry. The editors have put together this volume to demonstrate why the prescriptions employed to salvage the journalism industry to date haven’t worked, and to explain how constraints and pressures have influenced the field’s responses to challenges in an uncertain, changing environment. If journalism is to adjust and thrive, the following questions need answers: Why do journalists and news organizations respond to uncertainties in the ways they do? What forces and structures constrain these responses? What social and cultural contexts should we take into account when we judge whether or not journalism successfully responds and adapts? The book tackles these questions from varying perspectives and levels of analysis, through chapters by scholars of news sociology and media management. Changing the News details the forces that shape and challenge journalism and journalistic culture, and explains why journalists and their organizations respond to troubles, challenges and uncertainties in the way they do.

**Rethinking Journalism Again**-Chris Peters 2016-09-13
It’s easy to make a rhetorical case for the value of journalism. Because, it is a necessary precondition for democracy; it speaks to the
people and for the people; it informs citizens and enables them to make rational decisions; it functions as their watchdog on government and other powers that be. But does rehashing such familiar rationales bring journalism studies forward? Does it contribute to ongoing discussions surrounding journalism’s viability going forth? For all their seeming self-evidence, this book considers what bearing these old platitudes have in the new digital era. It asks whether such hopeful talk really reflects the concrete roles journalism now performs for people in their everyday lives. In essence, it poses questions that strike at the core of the idea of journalism itself. Is there a singular journalism that has one well-defined role in society? Is its public mandate as strong as we think? The internationally-renowned scholars comprising the collection address these recurring concerns that have long-defined the profession and which journalism faces even more acutely today. By discussing what journalism was, is, and (possibly) will be, this book highlights key contemporary areas of debate and tackles on-going anxieties about its future.

**Rethinking Journalism**-Chris Peters 2013

There is no doubt, journalism faces challenging times. Since the turn of the millennium, the financial health of the news industry is failing, mainstream audiences are on the decline, and professional authority, credibility and autonomy are eroding. The outlook is bleak and it's understandable that many are pessimistic. But this book argues that we have to rethink journalism fundamentally. Rather than just focus on the symptoms of the 'crisis of journalism', this collection tries to understand the structural transformation journalism is undergoing. It explores how the news media attempts to combat decreasing levels of trust, how emerging forms of news affect the established journalistic field, and how participatory culture creates new dialogues between journalists and audiences. Crucially, it does not treat these developments as distinct transformations. Instead, it considers how their interrelation accounts for both the tribulations of
the news media and the need for contemporary journalism to redefine itself.

Participatory Journalism - Jane B. Singer 2011-03-21 Who makes the news in a digital age? Participatory Journalism offers fascinating insights into how journalists in Western democracies are thinking about, and dealing with, the inclusion of content produced and published by the public. A timely look at digital news, the changes it is bringing for journalists and an industry in crisis Original data throughout, in the form of in-depth interviews with dozens of journalists at leading news organizations in ten Western democracies Provides a unique model of the news-making process and its openness to user participation in five stages Gives a first-hand look at the workings and challenges of online journalism on a global scale, through data that has been seamlessly combined so that each chapter presents the views of journalists in many nations, highlighting both similarities and differences,

both national and individual

Trust in Media and Journalism - Kim Otto 2018-01-07 All over Europe and the World communication scientists reflect questions on trust in journalism and media. A large scale of analysis and research gives new perspectives of reasons, impacts and consequences of trust or mistrust in media and journalism. This anthology provides an overview on empirical research to trust in media and journalism, new perspectives, methodological approaches and current results, discussed among communication scientists at European and international scientific conferences.

Journalism - Tim P. Vos 2018-05-22 This volume sets out the state-of-the-art in the discipline of journalism at a time in which the practice and profession of journalism is in serious flux. While journalism is still anchored to its history, change is infecting the field. The profession, and the
scholars who study it, are reconceptualizing what journalism is in a time when journalists no longer monopolize the means for spreading the news. Here, journalism is explored as a social practice, as an institution, and as memory. The roles, epistemologies, and ethics of the field are evolving. With this in mind, the volume revisits classic theories of journalism, such as gatekeeping and agenda-setting, but also opens up new avenues of theorizing by broadening the scope of inquiry into an expanded journalism ecology, which now includes citizen journalism, documentaries, and lifestyle journalism, and by tapping the insights of other disciplines, such as geography, economics, and psychology. The volume is a go-to map of the field for students and scholars—highlighting emerging issues, enduring themes, revitalized theories, and fresh conceptualizations of journalism.

The Global Journalist in the 21st Century - David H. Weaver 2012-06-25 The Global Journalist in the 21st Century systematically assesses the demographics, education, socialization, professional attitudes and working conditions of journalists in various countries around the world. This book updates the original Global Journalist (1998) volume with new data, adding more than a dozen countries, and provides material on comparative research about journalists that will be useful to those interested in doing their own studies. The editors put together this collection working under the assumption that journalists’ backgrounds, working conditions and ideas are related to what is reported (and how it is covered) in the various news media round the world, in spite of societal and organizational constraints, and that this news coverage matters in terms of world public opinion and policies. Outstanding features include: Coverage of 33 nations located around the globe, based on recent surveys conducted among representative samples of local journalists. Comprehensive analyses by well-known media scholars from each country. A section on comparative studies of journalists. An appendix with a collection of survey questions used in
various nations to question journalists As the most comprehensive and reliable source on journalists around the world, The Global Journalist will serve as the primary source for evaluating the state of journalism. As such, it promises to become a standard reference among journalism, media, and communication students and researchers around the world.

**Global Journalism**-Vera Slavtcheva-Petkova 2019

**Visual Journalism**-David Machin 2015-02-20

The digital age has revolutionised the look of journalism, be it online or in print. The subsequent shift to multi-media and multi-platform publishing arguably makes visual appearance and branding more important than ever. Yet visual journalism remains a relatively under-theorised and under-researched field. Visual Journalism presents a unique, critical investigation into this area. Combining theory and practice, the chapters integrate the experiences of practitioners working in photography, visual design and set design, including insights into how they work and the changing environments they find themselves in, with an innovative theory of visual communication – multimodality – that enables the text to break down and analyse the key elements and patterns of visual design. In exploring visual journalism from these two angles, and across a range of contemporary media platforms, the text evaluates the extent to which visual communication comprises a significant part of what content means to audiences. As such, the book is an invaluable resource for students of journalism, media studies and photography, as well as for practising designers and journalists.

**The SAGE Handbook of Digital Journalism**-Tamara Witschge 2016-04-30

The production and consumption of news in the digital era is blurring the boundaries between professionals, citizens and activists. Actors producing information are
multiplying, but still media companies hold central position. Journalism research faces important challenges to capture, examine, and understand the current news environment. The SAGE Handbook of Digital Journalism starts from the pressing need for a thorough and bold debate to redefine the assumptions of research in the changing field of journalism. The 38 chapters, written by a team of global experts, are organised into four key areas: Section A: Changing Contexts Section B: News Practices in the Digital Era Section C: Conceptualizations of Journalism Section D: Research Strategies By addressing both institutional and non-institutional news production and providing ample attention to the question ‘who is a journalist?’ and the changing practices of news audiences in the digital era, this Handbook shapes the field and defines the roadmap for the research challenges that scholars will face in the coming decades.

Lugmayr 2015-11-20 The Media Convergence Handbook sheds new light on the complexity of media convergence and the related business challenges. Approaching the topic from a managerial, technological as well as end-consumer perspective, it acts as a reference book and educational resource in the field. Media convergence at business level may imply transforming business models and using multiplatform content production and distribution tools. However, it is shown that the implementation of convergence strategies can only succeed when expectations and aspirations of every actor involved are taken into account. Media consumers, content producers and managers face different challenges in the process of media convergence. Volume I of the Media Convergence Handbook encourages an active discourse on media convergence by introducing the concept through general perspective articles and addressing the real-world challenges of conversion in the publishing, broadcasting and social media sectors.
Media Portrayals of Religion and the Secular Sacred - Kim Knott 2016-04-29 Is it true that Christianity is being marginalised by the secular media, at the expense of Islam? Are the mass media Islamophobic? Is atheism on the rise in media coverage? Media Portrayals of Religion and the Secular Sacred explores such questions and argues that television and newspapers remain key sources of popular information about religion. They are particularly significant at a time when religious participation in Europe is declining yet the public visibility and influence of religions seems to be increasing. Based on analysis of mainstream media, the book is set in the context of wider debates about the sociology of religion and media representation. The authors draw on research conducted in the 1980s and 2008-10 to examine British media coverage and representation of religion and contemporary secular values, and to consider what has changed in the last 25 years. Exploring the portrayal of Christianity and public life, Islam and religious diversity, atheism and secularism, and popular beliefs and practices, several media events are also examined in detail: the Papal visit to the UK in 2010 and the ban of the controversial Dutch MP, Geert Wilders, in 2009. Religion is shown to be deeply embedded in the language and images of the press and television, and present in all types of coverage from news and documentaries to entertainment, sports reporting and advertising. A final chapter engages with global debates about religion and media.

Social Media and the Value of Truth - Berrin Beasley 2013 This volume will be of special interest to anyone concerned with modern applied ethical issues, particularly those in the areas of philosophy, communication, media studies, and journalism. This volume brings together leading experts in journalism, communication studies, and philosophy to discuss the value of truth in an age of social media.
Journalism Without Profit - Magda Konieczna
2018-07-20 The last decade has witnessed a dramatic decline in the presence and influence of legacy news organizations. This decline has led to tremendous growth in news startups, which have attempted to fill the gap left by their legacy counterparts by producing the quality public service journalism upon which the health of U.S. democracy depends. If legacy news organizations, with their existing infrastructure, are failing, can these startups do any better? This question lies at the heart of Journalism Without Profit. Magda Konieczna explores three prominent news nonprofits: the Center for Public Integrity, one of the oldest and largest of its kind; the Wisconsin Center for Investigative Journalism, a university-based watchdog news organization that relies on others to publish its work; and MinnPost, an online news website. Through in-depth study of the practices of each newsroom, Konieczna isolates one common behavior that will contribute to their success: the way these organizations collaborate and share stories. Though this emergent behavior differentiates news nonprofits from the mainstream journalism from which they arose, it also ties the two forms of journalism together, as news nonprofits attempt to share stories with mainstream publications. In other words, the very behavior that may enable these organizations to do better than their mainstream counterparts also limits their ability to evolve much beyond them. In one of the first major books to focus on nonprofit journalism, Konieczna investigates the major questions that will open the field up to further study. Where did nonprofit news come from, and where is it going? Who funds it, and why? Ultimately, Konieczna offers a new way to think about the seismic changes in journalism that are defining the 21st-century.

Evolving Issues Surrounding Technoethics and Society in the Digital Age - Luppicini, Rocci
2014-06-30 The advancement of technologies in the 20th century has radically transformed the interconnectedness of humans, science, and
technology within an evolving society. Evolving Issues Surrounding Technoethics and Society in the Digital Age serves as an interdisciplinary base of scholarly contributions on the subject of technoethics, a field that deals with current and future problems that arise at the intersection of science, technological innovation, and human life and society. This premier reference work leverages ethical analysis, risk analysis, technology evaluation, and the combination of ethical and technological analyses within a variety of real life decision-making contexts, appealing to scholars and technology experts working in new areas of technology research where social and ethical issues emerge.

Boundaries of Journalism - Matt Carlson
2015-03-05 The concept of boundaries has become a central theme in the study of journalism. In recent years, the decline of legacy news organizations and the rise of new interactive media tools have thrust such questions as "what is journalism" and "who is a journalist" into the limelight. Struggles over journalism are often struggles over boundaries. These symbolic contests for control over definition also mark a material struggle over resources. In short: boundaries have consequences. Yet there is a lack of conceptual cohesiveness in what scholars mean by the term "boundaries" or in how we should think about specific boundaries of journalism. This book addresses boundaries head-on by bringing together a global array of authors asking similar questions about boundaries and journalism from a diverse range of perspectives, methodologies, and theoretical backgrounds. Boundaries of Journalism assembles the most current research on this topic in one place, thus providing a touchstone for future research within communication, media and journalism studies on journalism and its boundaries.

The Oxford Handbook of Religion and the American News Media - Diane Winston
2012-09-06 Whether the issue is the rise of
religiously inspired terrorism, the importance of faith based NGOs in global relief and development, or campaigning for evangelical voters in the U.S., religion proliferates in our newspapers and magazines, on our radios and televisions, on our computer screens and, increasingly, our mobile devices. Americans who assumed society was becoming more and more secular have been surprised by religions' rising visibility and central role in current events. Yet this is hardly new: the history of American journalism has deep religious roots, and religion has long been part of the news mix. Providing a wide-ranging examination of how religion interacts with the news by applying the insights of history, sociology, and cultural studies to an analysis of media, faith, and the points at which they meet, The Oxford Handbook of Religion and the American News Media is the go-to volume for both secular and religious journalists and journalism educators, scholars in media studies, journalism studies, religious studies, and American studies. Divided into five sections, this handbook explores the historical relationship between religion and journalism in the USA, how religion is covered in different media, how different religions are reported on, the main narratives of religion coverage, and the religious press.

**The Routledge Companion to British Media History** - Martin Conboy 2014-09-15 The Routledge Companion to British Media History provides a comprehensive exploration of how different media have evolved within social, regional and national contexts. The 50 chapters in this volume, written by an outstanding team of internationally respected scholars, bring together current debates and issues within media history in this era of rapid change, and also provide students and researchers with an essential collection of comparable media histories. The first two parts of the Companion comprise a series of thematic chapters reflecting broadly on historiography, providing historical context for discussions of the power of the media and their social importance, arranged in the following
sections: Media History Debates Media and Society. The subsequent parts are made up of in-depth sections on different media formats, exploring various approaches to historicizing media futures, divided as follows: Newspapers, Magazines, Radio, Film, Television, Digital Media.

The Routledge Companion to British Media History provides an essential guide to key ideas, issues, concepts and debates in the field. Chapter 40 of this book is freely available as a downloadable Open Access PDF at www.tandfebooks.com/openaccess. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license.

**Handbook of Research on Contemporary Storytelling Methods Across New Media and Disciplines** - Mihăeș, Lorena Clara 2021-01-15

Stories are everywhere around us, from the ads on TV or music video clips to the more sophisticated stories told by books or movies. Everything comes wrapped in a story, and the means employed to weave the narrative thread are just as important as the story itself. In this context, there is a need to understand the role storytelling plays in contemporary society, which has changed drastically in recent decades. Modern global society is no longer exclusively dominated by the time-tested narrative media such as literature or films because new media such as videogames or social platforms have changed the way we understand, create, and replicate stories. The Handbook of Research on Contemporary Storytelling Methods Across New Media and Disciplines is a comprehensive reference book that provides the relevant theoretical framework that concerns storytelling in modern society, as well as the newest and most varied analyses and case studies in the field. The chapters of this extensive volume follow the construction and interpretation of stories across a plethora of contemporary media and disciplines. By bringing together radical forms of storytelling in traditional disciplines and methods of telling stories across newer media, this book intersects themes that include...
interactive storytelling and narrative theory across advertisements, social media, and knowledge-sharing platforms, among others. It is targeted towards professionals, researchers, and students working or studying in the fields of narratology, literature, media studies, marketing and communication, anthropology, religion, or film studies. Moreover, for interested executives and entrepreneurs or prospective influencers, the chapters dedicated to marketing and social media may also provide insights into both the theoretical and the practical aspects of harnessing the power of storytelling in order to create a cohesive and impactful online image.

**Religious Complexity in the Public Sphere**
Inger Furseth 2017-08-20 This book is an empirical comparative study of the complexity of religion in the public spheres of the five Nordic countries. The result of a five-year collaborative research project, the work examines how increasingly religiously diverse Nordic societies regulate, debate, and negotiate religion in the state, the polity, the media, and civil society. The project finds that there are seemingly contradictory religious trends at different social levels: a growing secularization at the individual level, and a deprivatization of religion in politics, the media, and civil society. It offers a critique of the current theories of secularization and the return of religion, introducing religious complexity as an alternative concept to understand these paradoxes. This book is for scholars, students, and readers with an interest in understanding the public role of religion in the West.

**Media, Power and Empowerment**
Tereza Pavlíčková 2014-10-16 This collection brings together 71 papers by 83 authors from 20 countries presented at the 5th Central and Eastern European Communication and Media Conference, titled “Media, Power and Empowerment”, in Prague, Czech Republic, in April 2012. It maps out trends in CEE media research across the entire region and provides
insight into the broad span of relevant topics. The contributors to the volume successfully voice the multiple, yet specific, questions relevant to the CEE countries; the papers offer original research results to the reader, and invite them to participate in further debate on CEE media and communications research. To date, there have not been many publications dedicated to outlining the media and communications research interests across the region. This collection shows that the countries of the region indeed have a lot in common – historically, politically, and socially – while also discussing the differences among them, including the multiple political particularities within the unifying label “the East”, and variations in the transformation process and the consequences for concerned societies and their media scenes, as well as the individual lived experiences of the people of the CEE countries.

Appearance, Discrimination and the Media-
Diana Garrisi 2018-07-27 The portrayal of disfigurement in the UK media must change. This policy brief is based on recent research that found a general negative and sensationalised attitude towards disfigurement in the media. Disfigurement is a condition that can affect anyone at any time in life regardless their social or demographic background due to accidents or health conditions or be congenital. In the UK, one in 111 people have facial disfigurements. In order to improve the ways in which media portray disfigurement, this policy brief argues that media should move away from sensationalised coverage on disfigurement and focus instead on the lived experiences of individuals with this condition. It recommends strengthening diversity-oriented editorial practices and training as well as media literacy education. In addition, it addresses the lack of guidelines on the portrayal of disfigurement and urges regulatory bodies to be more efficient in handling complaints.

Handbook of Social Media Management-Mike
Digitization and Web 2.0 have brought about continuous change from traditional media management to new strategic, operative and normative management options. Social media management is on the agenda of every media company, and requires a new set of specialized expertise on digital products and communication. At the same time, social media has become a vibrant field of research for media economists and media management researchers. In this handbook, international experts present a comprehensive account of the latest developments in social media research and management, consistently linking classical media management with social media. The articles discuss new theoretical approaches as well as empirical findings and applications, yielding an interesting overview of interdisciplinary and international approaches. The book’s main sections address forms and content of social media; impact and users; management with social media; and a new value chain with social media. The book will serve as a valuable reference work for researchers, students and professionals working in media and public relations.

**Seeing Human Rights** - Sandra Ristovska 2021
"Explores the rise of video in human rights activism and in the wider context of journalism, the law, and advocacy"--

**The Sacred in the Modern World** - Gordon Lynch 2012-02-16
Re-interpreting Durkheim's theory of the sacred, this book sets out a theory of the sacred for use across a range of humanities and social science disciplines and draws on contemporary case study material to show how sacred forms - whether in 'religious' or 'secular' guise - continue to shape social life in the modern world.

**News on the Right** - Anthony Nadler 2019
From the National Review to Breitbart, from Fox News to Rush Limbaugh, conservative news is an
inescapable feature of modern politics. Since the early days of mass communication, right-wing media producers have blended reporting with commentary, narrating the news of the day from a perspective informed by conservative worldviews and partisanship. News on the Right seeks to initiate a new interdisciplinary field of scholarly research focused on the study of right-wing media and conservative news. Editors Anthony Nadler and A.J. Bauer gather a range of voices, presenting an interdisciplinary investigation into the practices and patterns of meaning-making in the production, circulation, and consumption of conservative news. Traversing journalism, media and communication studies, cultural studies, history, political science, and sociology, this volume utilizes a variety of qualitative and quantitative research methods to elucidate case studies of conservative news cultures in the US and UK. Together, these perspectives show that a fuller understanding of right-wing media and its effects can be reached by treating these phenomena as deeply interwoven into many conservatives' lives and political sensibilities.

**Everyday Media Culture in Africa**-Wendy Willems 2016-11-10 African audiences and users are rapidly gaining in importance and increasingly targeted by global media companies, social media platforms and mobile phone operators. This is the first edited volume that addresses the everyday lived experiences of Africans in their interaction with different kinds of media: old and new, state and private, elite and popular, global and national, material and virtual. So far, the bulk of academic research on media and communication in Africa has studied media through the lens of media-state relations, thereby adopting liberal democracy as the normative ideal and examining the potential contribution of African media to development and democratization. Focusing instead on everyday media culture in a range of African countries, this volume contributes to the broader project of provincializing and decolonizing audience and internet studies.
Key Concepts in Media and Communications - Paul Jones 2011-12-06 This book covers the key concepts central to understanding recent developments in media and communications studies. Wide-ranging in scope and accessible in style it sets out a useful, clear map of the important theories, methods, and debates. The entries critically explore the limits of a key concept as much as the traditions that define it. They include clear definitions, are introduced within the wider context of the field and each one is fully cross-referenced, is clearly illustrated with relevant examples, and provides a guide to further reading and an index.

Media Activism in the Digital Age - Victor Pickard 2017-07-06 Media Activism in the Digital Age captures an exciting moment in the evolution of media activism studies and offers an invaluable guide to this vibrant and evolving field of research. Victor Pickard and Guobin Yang have assembled essays by leading scholars and activists to provide case studies of feminist, technological, and political interventions during different historical periods and at local, national, and global levels. Looking at the underlying theories, histories, politics, ideologies, tactics, strategies, and aesthetics, the book takes an expansive view of media activism. It explores how varieties of activism are mediated through communication technologies, how activists deploy strategies for changing the structures of media systems, and how governments and corporations seek to police media activism. From memes to zines, hacktivism to artivism, this volume considers activist practices involving both older kinds of media and newer digital, social, and network-based forms. Media Activism in the Digital Age provides a useful cross-section of this growing field for both students and researchers.
